Patient Name	MR ANGSUMAN DAS		**Date & Time of Collection**	09/03/2022	18:31:56
Doctor	Dr N/A		**Date & Time of Receiving**	09/03/2022	18:31:56
Ward/Bed			**Date & Time of Reporting**	09/03/2022	20:05:42

HBsAG

- The results from this or any other diagnostic kit should be used and interpreted only in the context of the overall clinical picture.
- Heterophilic, e.g. human anti- mouse, antibodies in the serum or plasma of certain individuals are known to cause interference with immunoassays.
- Individuals recently vaccinated for hepatitis B may give a transient positive result for HBsAg because of its presence in the vaccine.

----End of report----

Disclaimer

1. The department of Laboratory Medicine of Health City Hospital confirms that all tests have been assayed with highest quality standards with clinical safety and technical integrity
2. The test result may vary from lab to lab or from time to time for the same parameters for the same patient
3. The results of a laboratory test are dependent on the quality of the sample as well as the assay technology
4. This report is not subject to use for any medico-legal purpose.
5. It is presumed that the test sample belongs to the patient named or identified in the test requisition form.
6. For any uncontrolled circumstances the result may be delayed.Kindly contact department of Laboratory Medicine for any transcription error.
