Medical Records — Ranu Das

Chronological compilation of photographed hospital papers, prescriptions, reports and bills · 2002 – 2014 (breast cancer treatment at Dr. B. Borooah Cancer Institute, Guwahati, and later records) · searchable transcription of every page followed by the source photograph

How to read this file. Each record has a transcription page (selectable, copyable text) followed by the original photograph (rotated upright). Typed reports were transcribed directly; handwritten items were read by eye and are best-effort — values marked [?] are uncertain, and a note beneath a title says what is uncertain. Dates are those printed or written on each document (DD/MM/YYYY, Indian order); undated papers are placed last. Always check important details against the photograph. This is a records compilation, not medical advice.

Index

#	Date	Document	Provider
1	2002-08-22	Gynaecology consultation prescription (handwritten)	Dr. S. Gogoi
2	2002-08-23	X-ray report — chest PA	Tezpur X-Ray Clinic (X-ray & Ultrasound)
3	2002-08-26	Laboratory report — blood chemistry	Gogoi Nursing Home Complex
4	2002-08-26	Laboratory report — examination report (blood, urine)	Gogoi Nursing Home Complex
5	2002-09-01	ECG report (handwritten note)	Dr. Rini Duarah
6	2002-09-01	Hospital medicine requisition note (handwritten)	Gogoi Nursing Home Complex
7	2002-09-02	Hospital medicine requisition note (handwritten)	Gogoi Nursing Home Complex
8	2002-09-03	Hospital receipt — blood examination (Rs. 70)	Dr. B. Borooah Cancer Institute
9	2002-09-05	Histopathology report	BHL Diagnostic Centre
10	2002-09-06	Post-operative prescriptions (handwritten, two dates)	Gogoi Nursing Home Complex
11	2002-09-06	Discharge slip	Gogoi Nursing Home Complex

Ganga Clinical Laboratory, G.S. Road, Ulubari, Guwahati-781007 — Dr. Anuradha, MD, Pathologist

Registration No. 504/02 · Patient: Mrs. Ranu Das · Sex Female · Age 35 yrs · Referred by Dr. S. Gogoi, M.S. · Hospital: Gogoi Nursing Home · Specimen received 06-09-2002 · Report date 13-09-2002.
Clinical diagnosis: Breast lump (R). Nature of specimen: tissue from the lesion sent for HPE. Gross appearance: single piece of tissue 1 cm × 0.8 cm, light-yellow, soft.
Microscopic: serial sections were made; ductal epithelial cells are found infiltrated into the surrounding collagenous stromal tissue. All the neoplastic cells have hyperchromatic prominent nuclei and relatively scanty eosinophilic cytoplasm. Occasional mitosis also seen. No evidence of any other specific pathology.
IMPRESSION: Duct carcinoma of breast of infiltrating type. (1 slide enclosed.)

Name: Renu Das · Age 35 yrs · Sex Female · Date 21.09.02 · Ref. Dr. Bhabesh Kr. Das, MS · Exam: Ultrasound whole abdomen (F).

Liver is of normal echogenicity. No focal or diffuse lesions seen. Intrahepatic bile ducts are not dilated. CBD measures about 5 mm. Portal vein and porta hepatis appear normal. GB is well distended; wall thickness normal; no calculi or mass; no oedema around GB wall. Pancreas is normal in size, shape and echogenicity; pancreatic duct not dilated. Spleen is normal in size and echogenicity. Kidneys are of normal size and show normal echoanatomy; no obvious calculi or hydronephrosis; normal corticomedullary differentiation; no perirenal collection; no ureteric dilatation. U. bladder shows normal wall thickness; no intrinsic or extrinsic lesions. Uterus is normal in size; CEE is normal; no collection in endometrial cavity; echogenicity of myometrium is normal; no focal lesion or calcification. A 21 mm diameter cystic structure is seen in RO; no septa or mural nodules. LO is normal in size and echogenicity. Aorta and para-aortic regions appear normal. No ascites.

IMPRESSION: Small right ovarian cyst; likely to be functional. Signed 21.9.02.

Page 1 of 1

All investigations have their limitation which are imposed by the limits of sensitivity and specificity of individual assay procedures as well as the quality of the specimen received by the laboratory. Isolated laboratory investigations never confirm the final diagnosis of the disease. They only help in arriving at a diagnosis in conjunction with clinical presentation and other related investigations. (Also refer to "CONDITIONS OF REPORTING" on the reverse.)

44. 19/11/2002 — X-ray chest (PA) and barium swallow report

Saraighat X-Ray & Clinical Laboratory, Dr. B. Barooah Road, Ulubari, Guwahati-781007

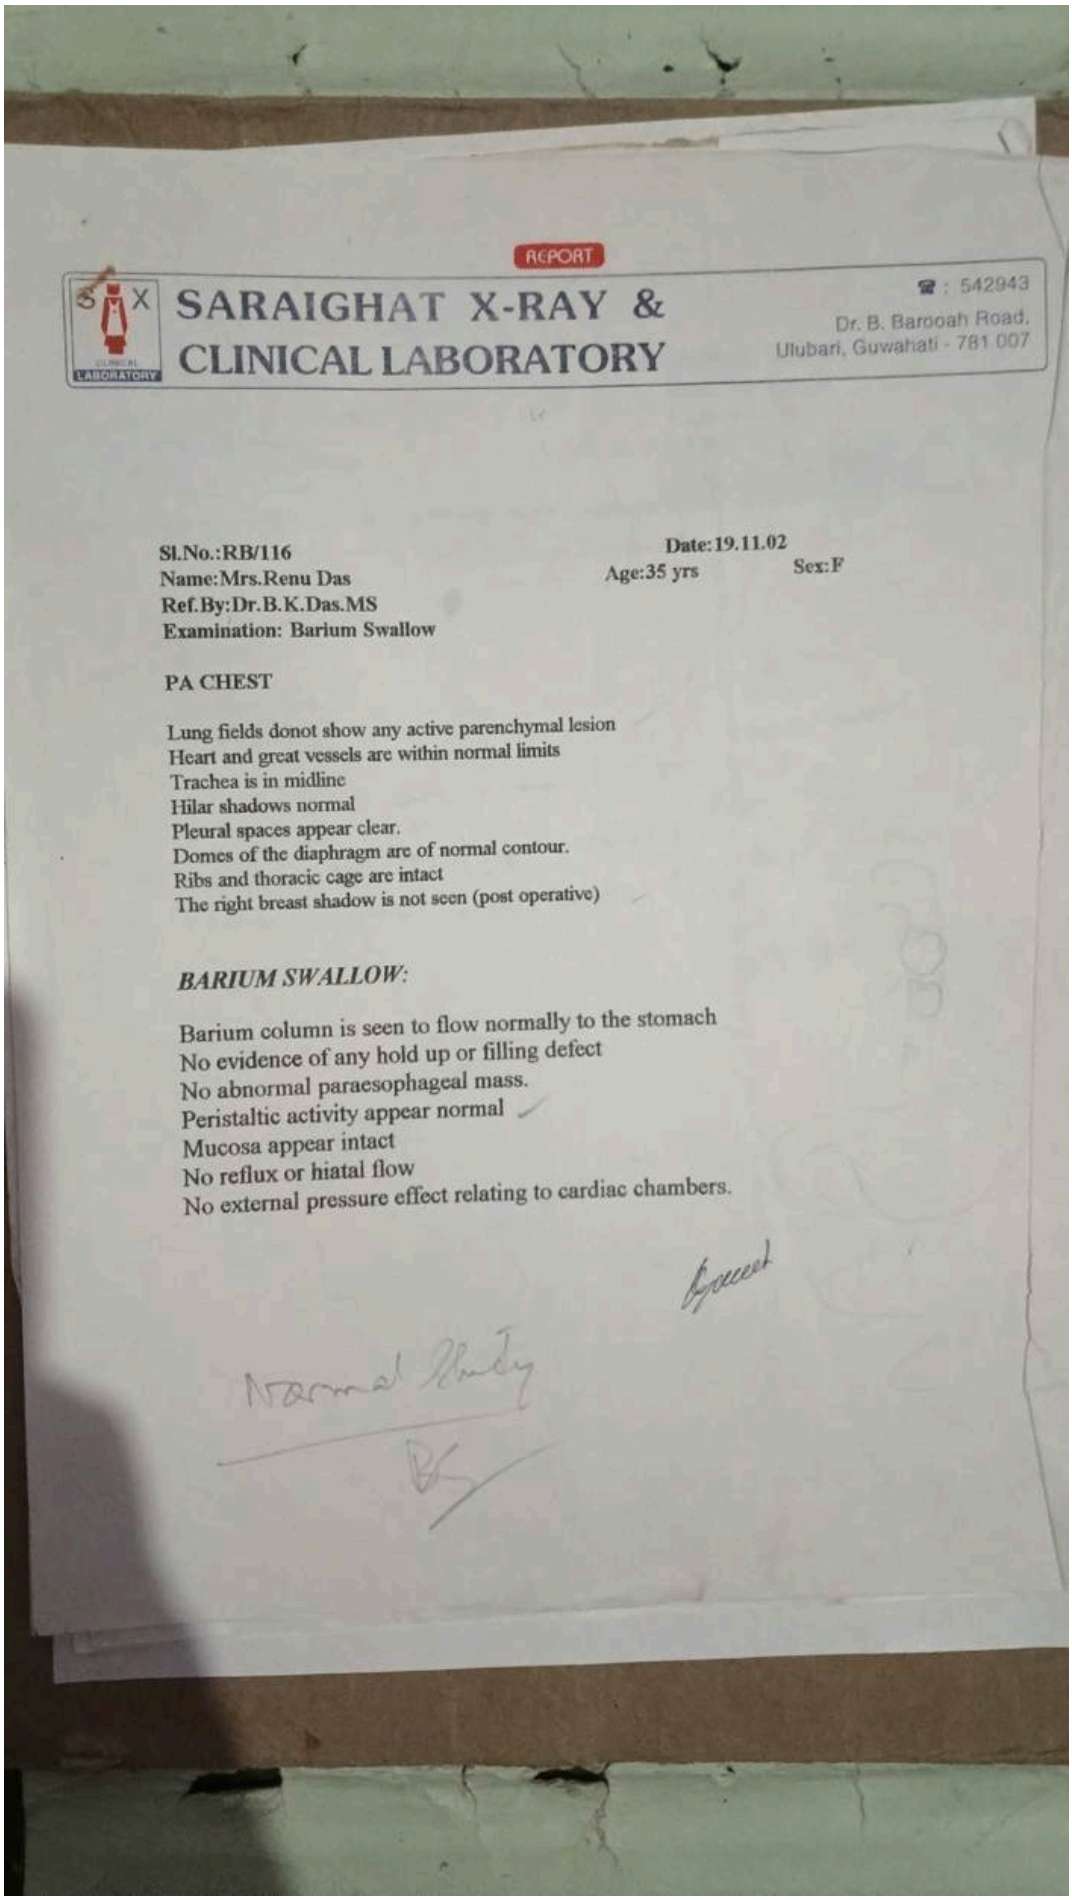

Sl. No. RB/116 · Date 19.11.02 · Mrs. Renu Das · Age 35 yrs · Sex F · Ref. by Dr. B.K. Das, MS · Examination: Barium swallow.

PA CHEST: Lung fields do not show any active parenchymal lesion. Heart and great vessels are within normal limits. Trachea is in midline. Hilar shadows normal. Pleural spaces appear clear. Domes of the diaphragm are of normal contour. Ribs and thoracic cage are intact. The right breast shadow is not seen (post operative).

BARIUM SWALLOW: Barium column is seen to flow normally to the stomach. No evidence of any hold up or filling defect. No abnormal paraesophageal mass. Peristaltic activity appears normal. Mucosa appears intact. No reflux or hiatal flow. No external pressure effect relating to cardiac chambers. (Handwritten: "Normal study", initials.)

Name: Ranu Das · Age 35 Yrs · Sex Female · Date 16.12.03 · Ref. Dr. B.K. Das, MS · Examination: Ultrasound upper abdomen.

Right lobe of the liver is bulky in size. The liver shows nonhomogeneously increased echogenicity with diffuse distribution. No focal lesions seen. Intrahepatic bile ducts are not dilated. CBD measures about 6 mm; no obvious calculi seen in the CBD. Porta hepatis and portal vein appear normal. GB is normally distended; wall thickness is normal; no calculi or mass seen; no oedema seen around GB wall. Pancreas shows normal size, shape and echotextures; pancreatic duct not dilated. Spleen is also normal in size and echogenicity. Kidneys are normal in size; central renal sinus echoes are normal; no obvious calculi or hydronephrosis seen; cortical thickness and echogenicity normal; normal corticomedullary differentiation preserved; no perirenal collection. RK measures about 100 × 38 mm while LK 92 × 48 mm. No ascites. Aorta and para-aortic region normal; no lymphadenopathy.

IMPRESSION: Grade I fatty liver. Signed 16-12-03.

108. 18/12/2003 — Ultrasound lower abdomen (transabdominal & TVS)

Saraighat X-Ray & Clinical Laboratory, Dr. B. Baroah Road, Ulubari, Guwahati-781007

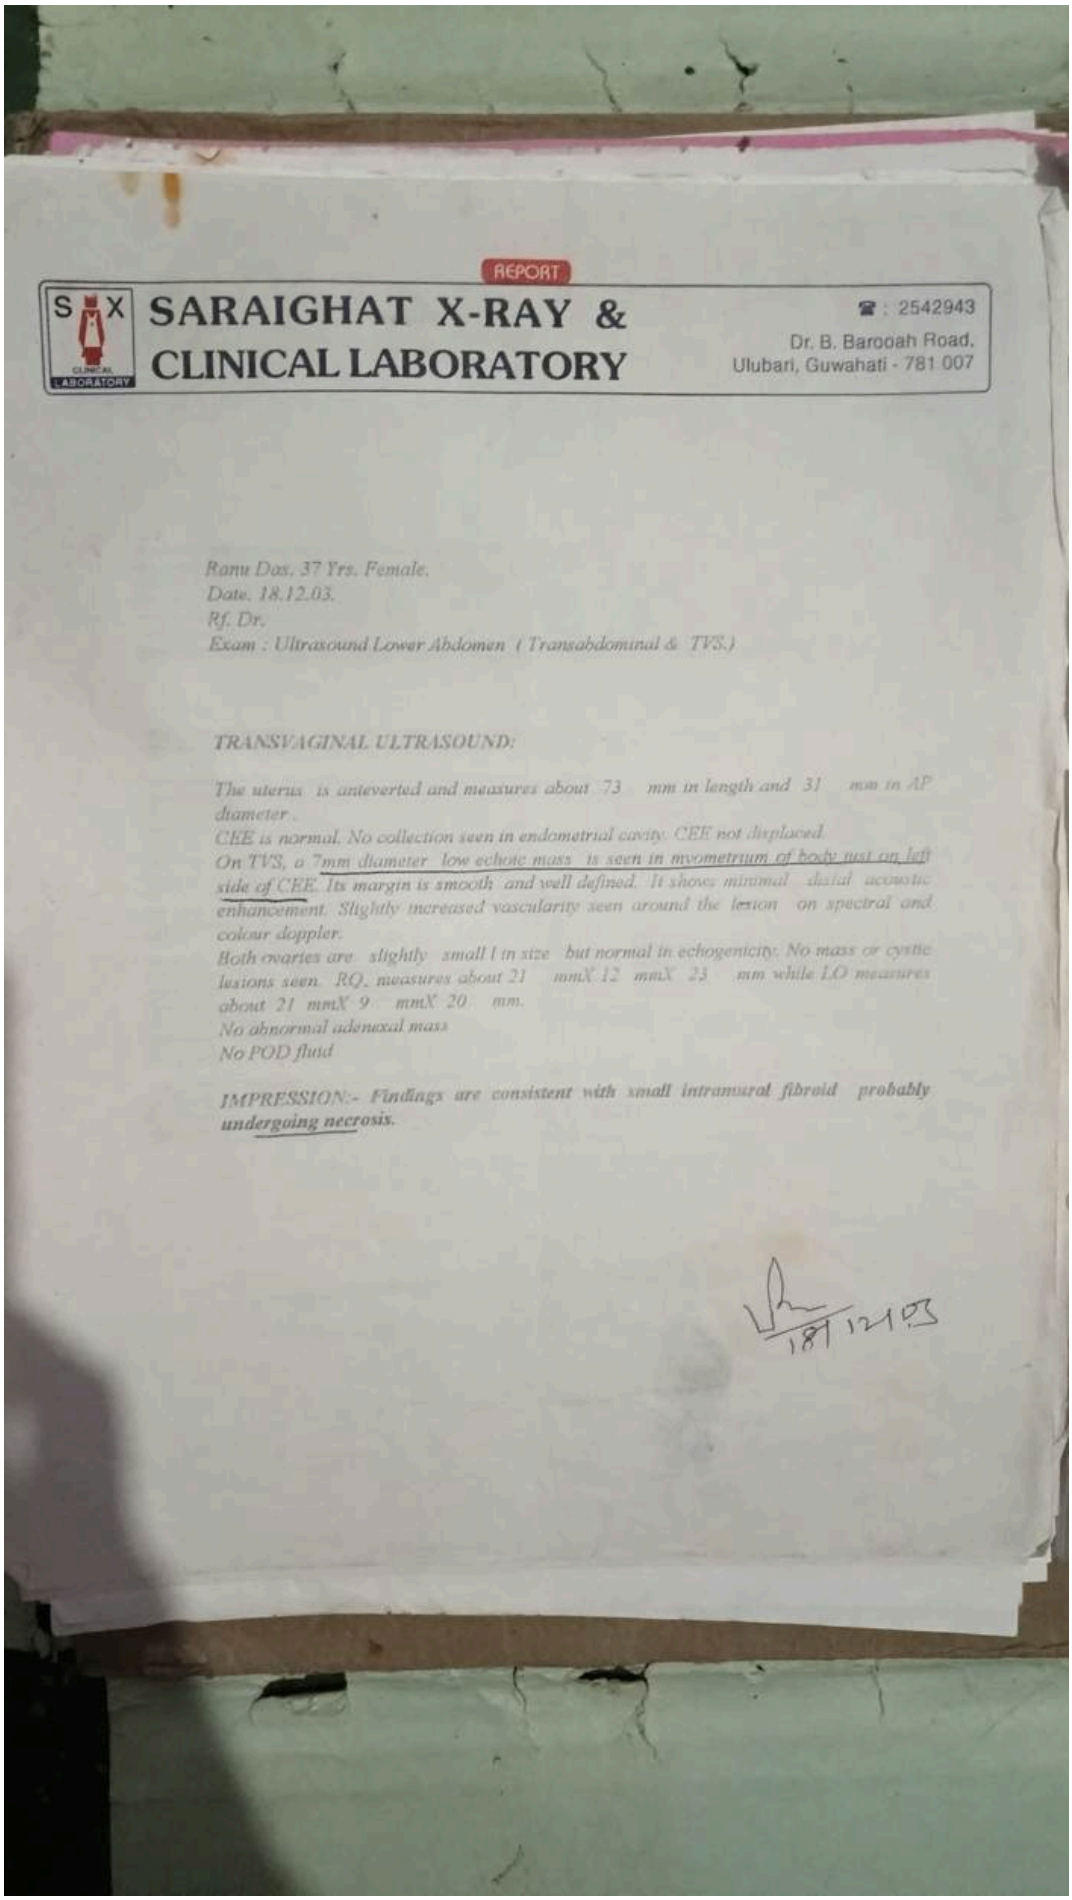

Rama [sic] Das, 37 Yrs, Female · Date 18.12.03 · Rf. Dr. · Exam: Ultrasound lower abdomen (transabdominal & TVS).

TRANSVAGINAL ULTRASOUND: The uterus is anteverted and measures about 73 mm in length and 31 mm in AP diameter. CEE is normal. No collection seen in endometrial cavity. CEE not displaced. On TVS, a 7 mm diameter low echoic mass is seen in myometrium of body just on left side of CEE. Its margin is smooth and well defined. It shows minimal distal acoustic enhancement. Slightly increased vascularity seen around the lesion on spectral and colour Doppler. Both ovaries are slightly small in size but normal in echogenicity. No mass or cystic lesions seen. RO measures about 21 × 12 × 23 mm while LO measures about 21 × 9 × 20 mm. No abnormal adnexal mass. No POD fluid.

IMPRESSION: Findings are consistent with small intramural fibroid, probably undergoing necrosis. Signed 18/12/03.

117. 01/11/2004 — Ultrasound lower abdomen (T/A) & TVS

Saraighat X-Ray & Clinical Laboratory, Dr. B. Baruah Road, Ulubari, Guwahati-781007

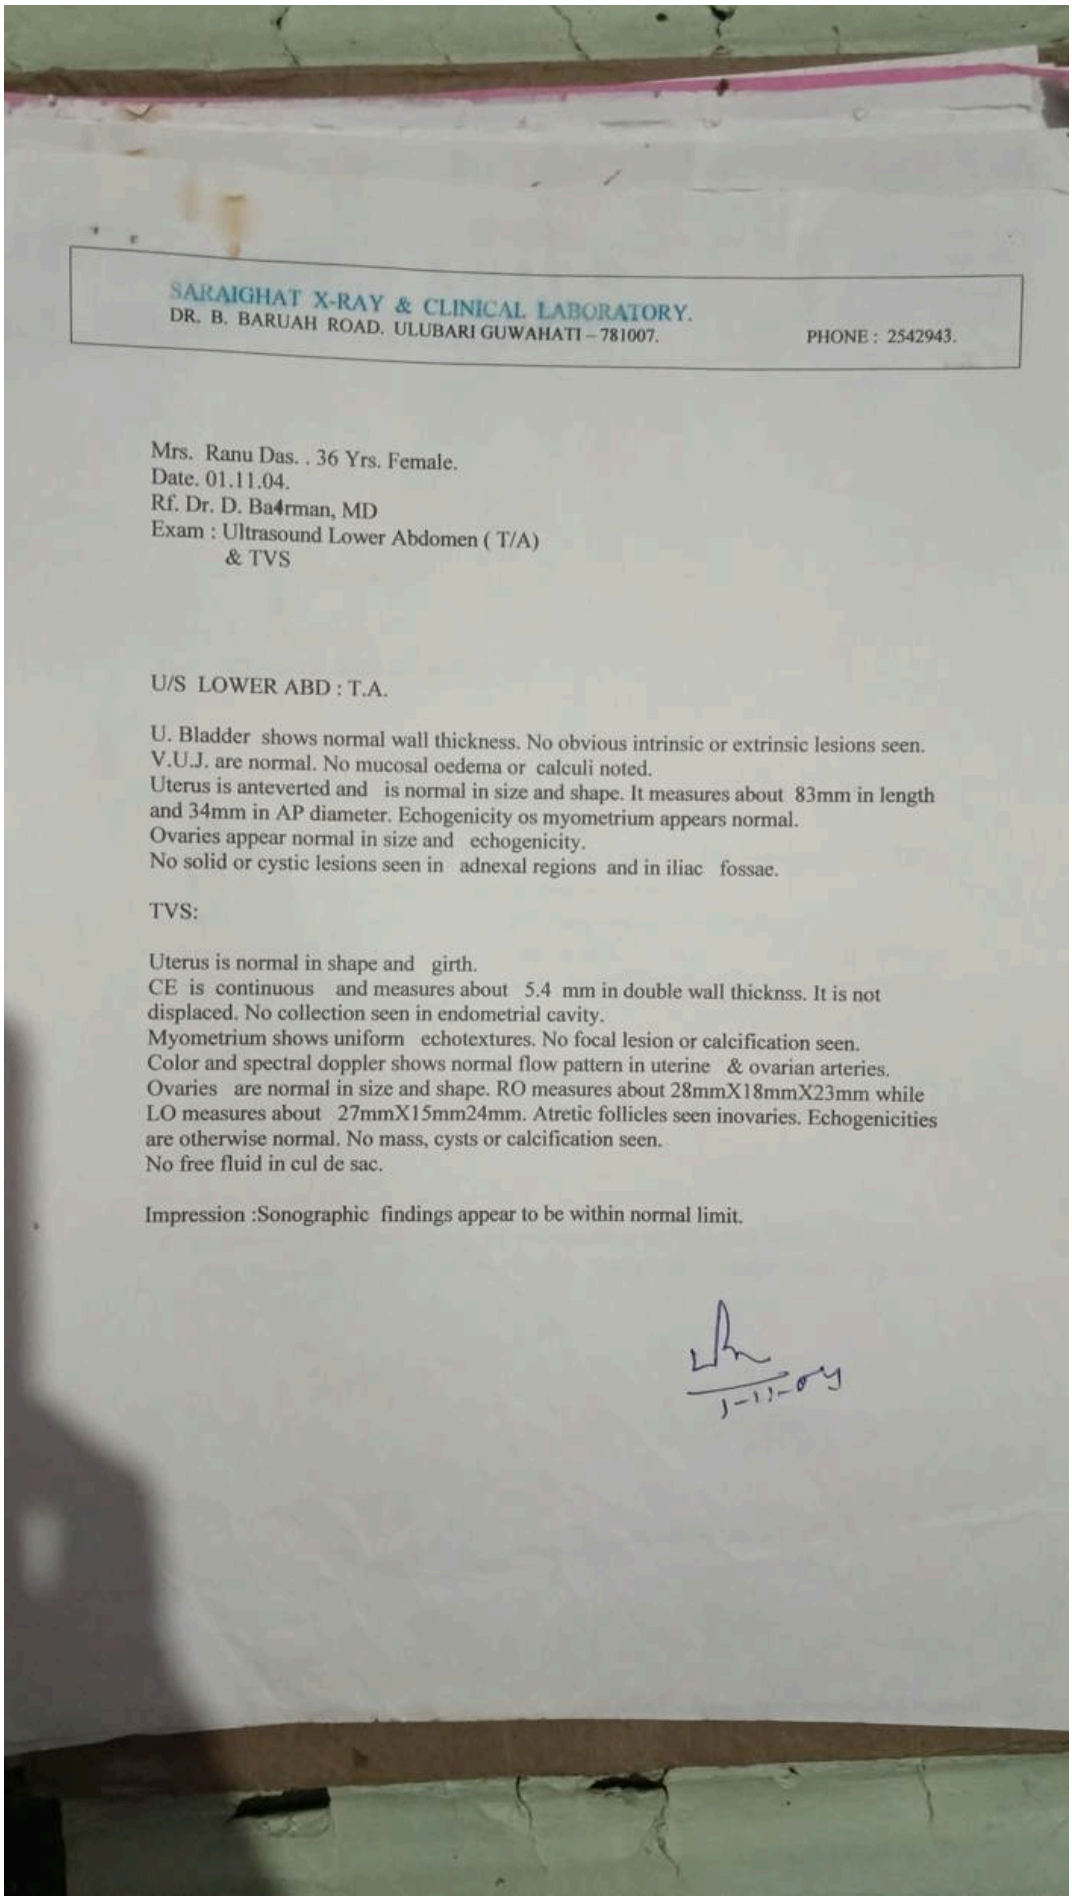

Mrs. Ranu Das, 36 Yrs, Female · Date 01.11.04 · Rf. Dr. D. Barman, MD · Exam: Ultrasound lower abdomen (T/A) & TVS.

U/S LOWER ABD (T.A.): U. bladder shows normal wall thickness; no obvious intrinsic or extrinsic lesions; V.U.J. are normal; no mucosal oedema or calculi. Uterus is anteverted and normal in size and shape; measures about 83 mm in length and 34 mm in AP diameter; echogenicity of myometrium appears normal. Ovaries appear normal in size and echogenicity. No solid or cystic lesions in adnexal regions and iliac fossae.

TVS: Uterus is normal in shape and girth. CE is continuous and measures about 5.4 mm in double wall thickness; not displaced; no collection in endometrial cavity. Myometrium shows uniform echotexture; no focal lesion or calcification. Colour and spectral Doppler show normal flow pattern in uterine & ovarian arteries. Ovaries are normal in size and shape: RO about 28 × 18 × 23 mm, LO about 27 × 15 × 24 mm; atretic follicles seen in ovaries; echogenicities otherwise normal; no mass, cysts or calcification. No free fluid in cul de sac.

IMPRESSION: Sonographic findings appear to be within normal limit. Signed 1-11-04.

122. 05/04/2005 — Ultrasound lower abdomen (transabdominal & TVS)

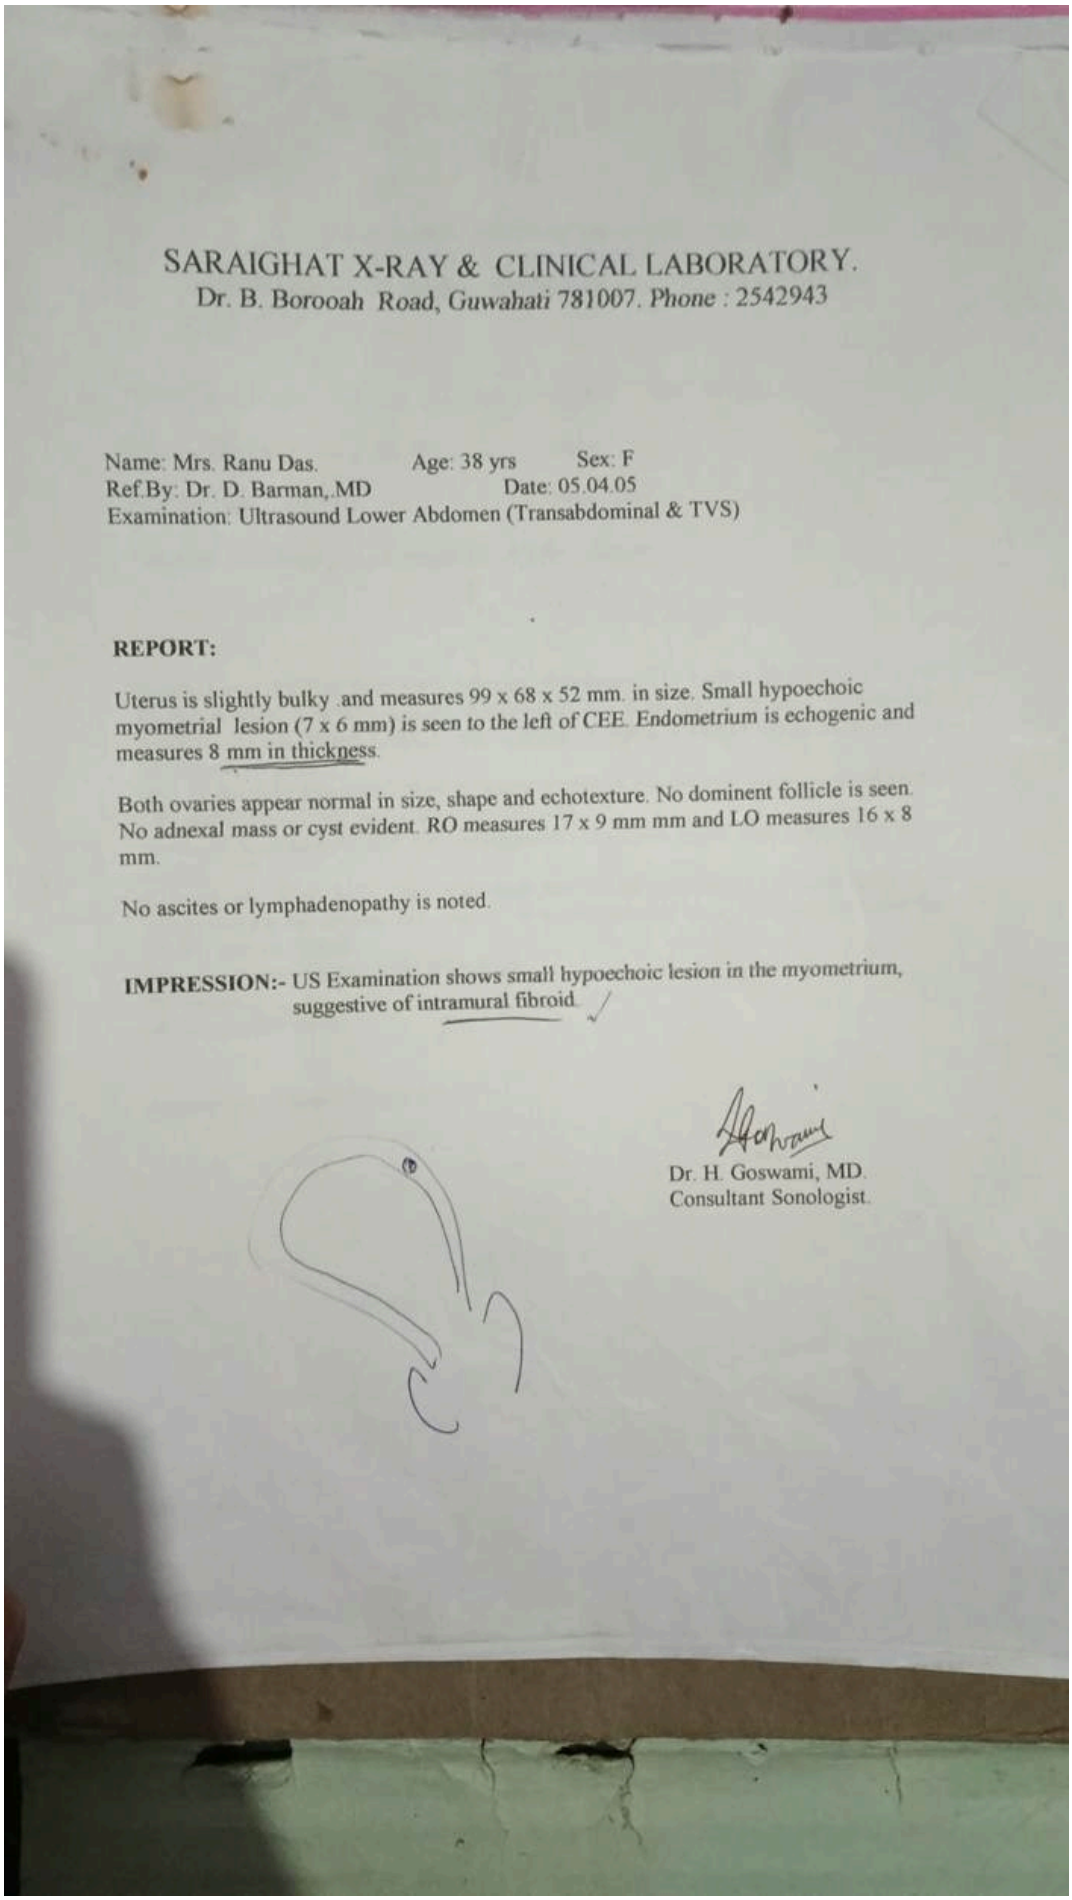

Saraighat X-Ray & Clinical Laboratory, Dr. B. Barooah Road, Guwahati-781007 — Dr. H. Goswami, MD, Consultant Sonologist

Name: Mrs. Ranu Das · Age 38 yrs · Sex F · Date 05.04.05 · Ref. By Dr. D. Barman, MD · Examination: Ultrasound lower abdomen (transabdominal & TVS).

REPORT: Uterus is slightly bulky and measures 99 × 68 × 52 mm in size. Small hypoechoic myometrial lesion (7 × 6 mm) is seen to the left of CEE. Endometrium is echogenic and measures 8 mm in thickness. Both ovaries appear normal in size, shape and echotexture. No dominant follicle is seen. No adnexal mass or cyst evident. RO measures 17 × 9 mm and LO measures 16 × 8 mm. No ascites or lymphadenopathy is noted.

IMPRESSION: US examination shows small hypoechoic lesion in the myometrium, suggestive of intramural fibroid.

Source photo: 2005-04-05_122_Ultrasound-lower-abdomen.jpg

130. 17/10/2005 — Ultrasound upper abdomen

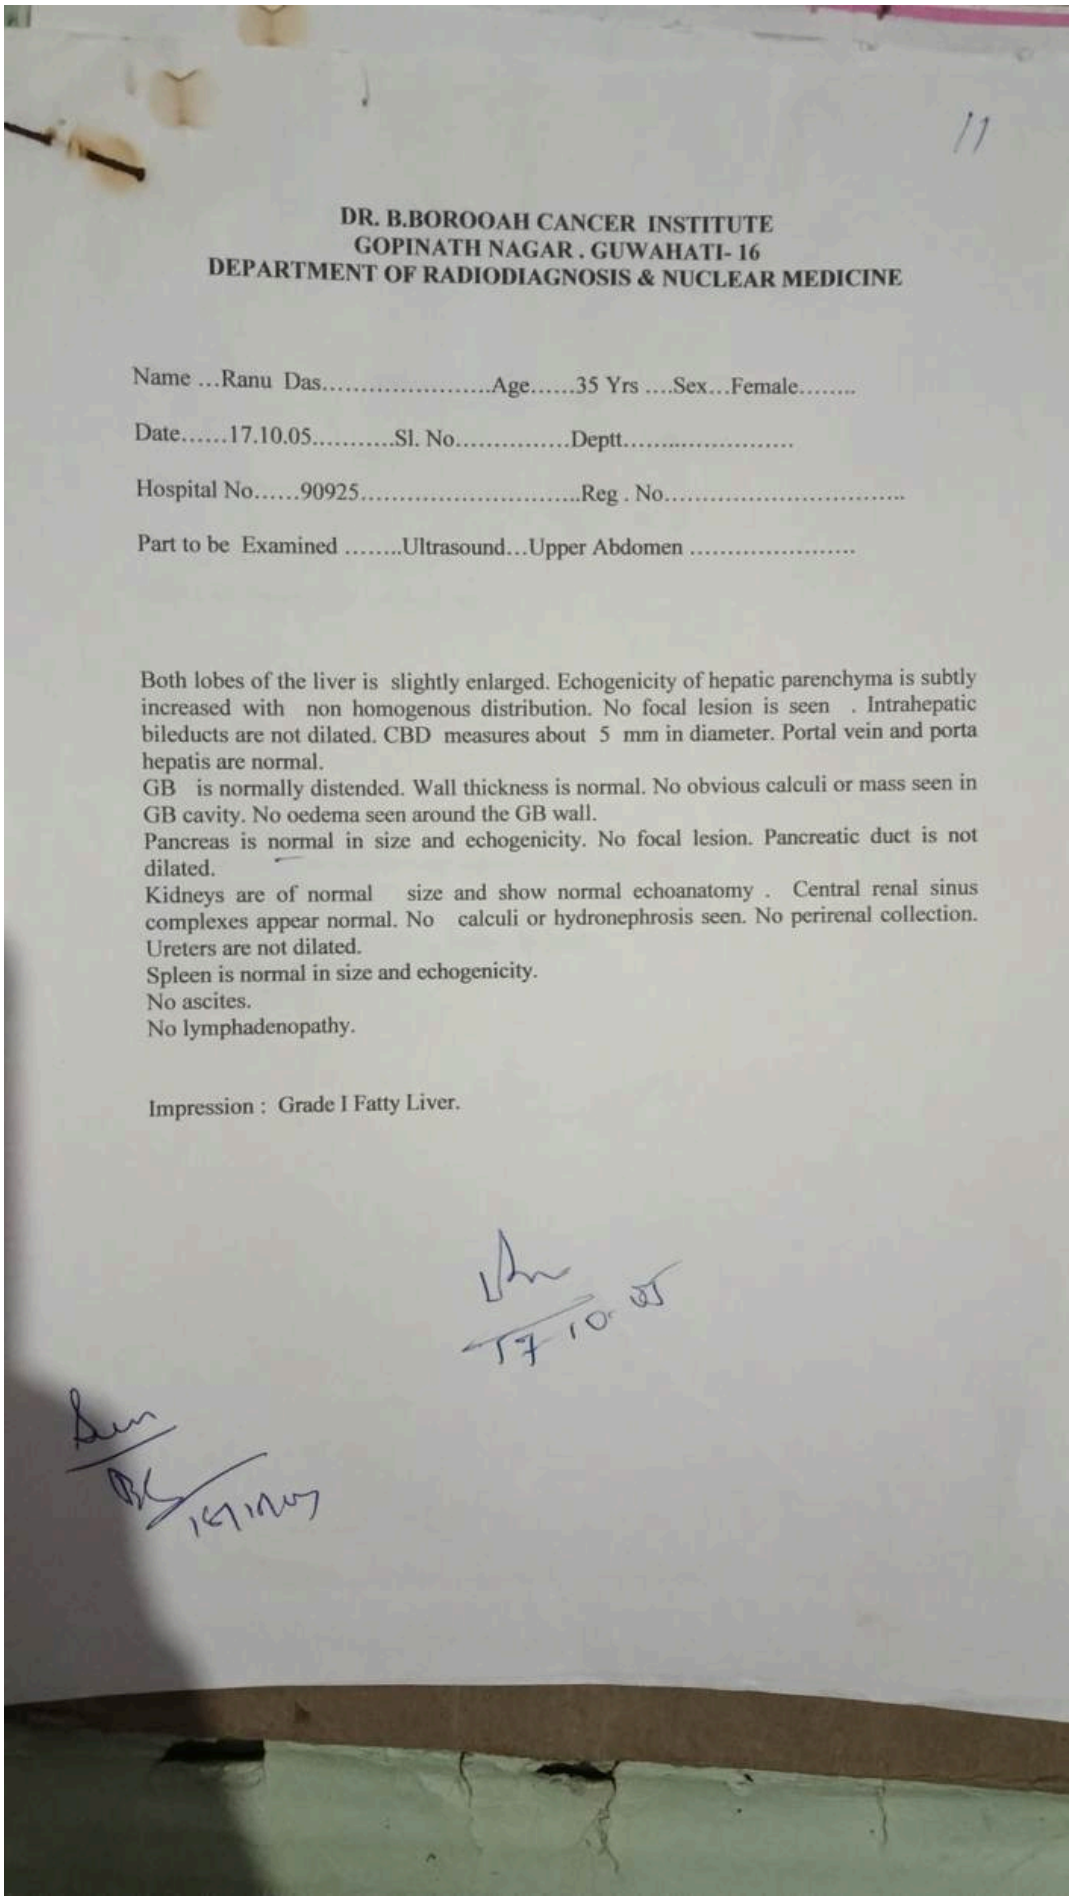

Dr. B. Borooah Cancer Institute, Gopinath Nagar, Guwahati-16, Dept. of Radiodiagnosis & Nuclear Medicine

Name: Ranu Das · Age 35 Yrs · Sex Female · Date 17.10.05 · Hospital No. 90925 · Part to be examined: Ultrasound — upper abdomen.

Both lobes of the liver are slightly enlarged. Echogenicity of hepatic parenchyma is subtly increased with non-homogeneous distribution. No focal lesion is seen. Intrahepatic bile ducts are not dilated. CBD measures about 5 mm in diameter. Portal vein and porta hepatis are normal. GB is normally distended; wall thickness is normal; no obvious calculi or mass seen in GB cavity; no oedema around the GB wall. Pancreas is normal in size and echogenicity; no focal lesion; pancreatic duct is not dilated. Kidneys are of normal size and show normal echoanatomy; central renal sinus complexes appear normal; no calculi or hydronephrosis seen; no perirenal collection. Ureters are not dilated. Spleen is normal in size and echogenicity. No ascites. No lymphadenopathy.

IMPRESSION: Grade I fatty liver. Signed 17/10/05.

Saraighat X-Ray & Clinical Laboratory (Wellspring), Dr. B. Barooah Road, Guwahati-781007

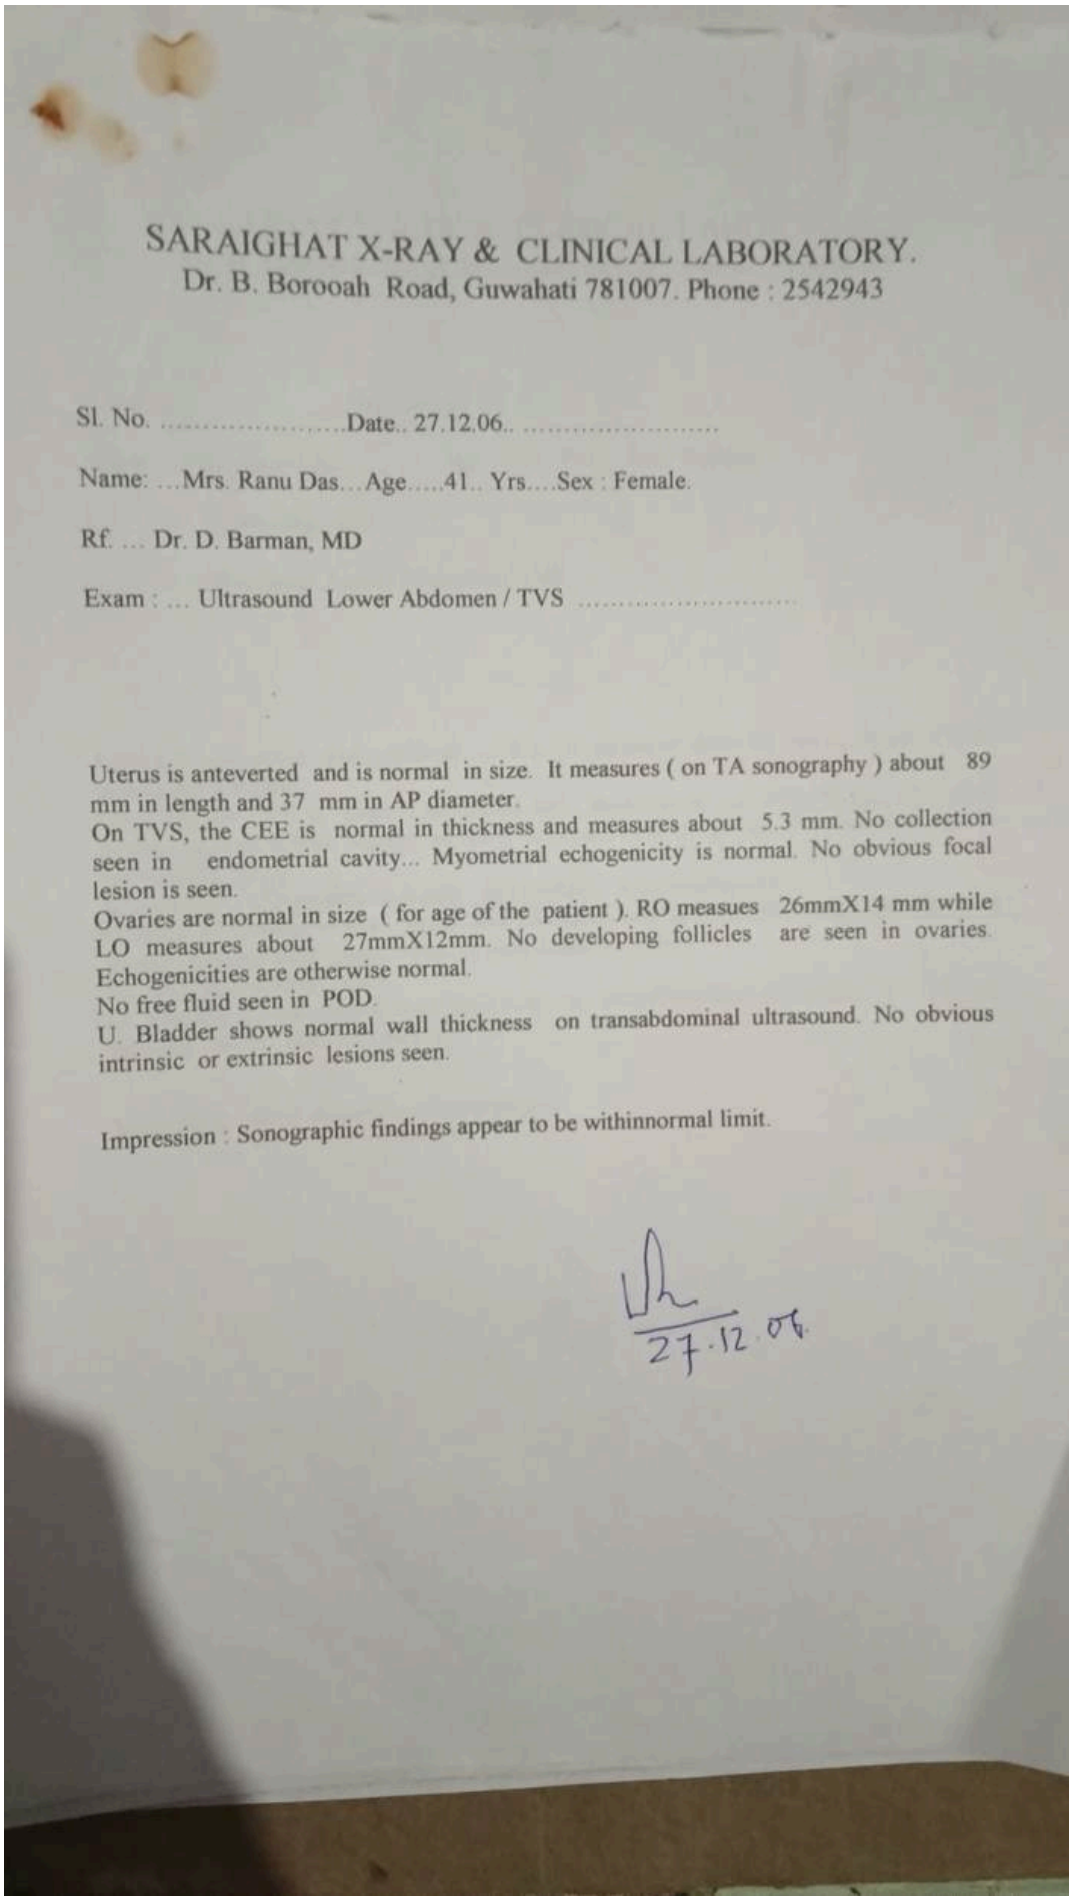

Date 27.12.06 · Name: Mrs. Ranu Das · Age 41 Yrs · Sex: Female · Ref. Dr. D. Barman, MD · Exam: Ultrasound lower abdomen / TVS.

Uterus is anteverted and normal in size; measures (on TA sonography) about 89 mm in length and 37 mm in AP diameter. On TVS the CEE is normal in thickness and measures about 5.3 mm. No collection seen in endometrial cavity. Myometrial echogenicity is normal; no obvious focal lesion. Ovaries are normal in size (for age of the patient): RO measures 26 mm × 14 mm, LO measures about 27 mm × 12 mm; no developing follicles are seen in ovaries; echogenicities otherwise normal. No free fluid in POD. U. bladder shows normal wall thickness on transabdominal ultrasound; no obvious intrinsic or extrinsic lesions.

IMPRESSION: Sonographic findings appear to be within normal limit. Signed 27.12.06.

152. 03/03/2007 — Ultrasound lower abdomen / TVS

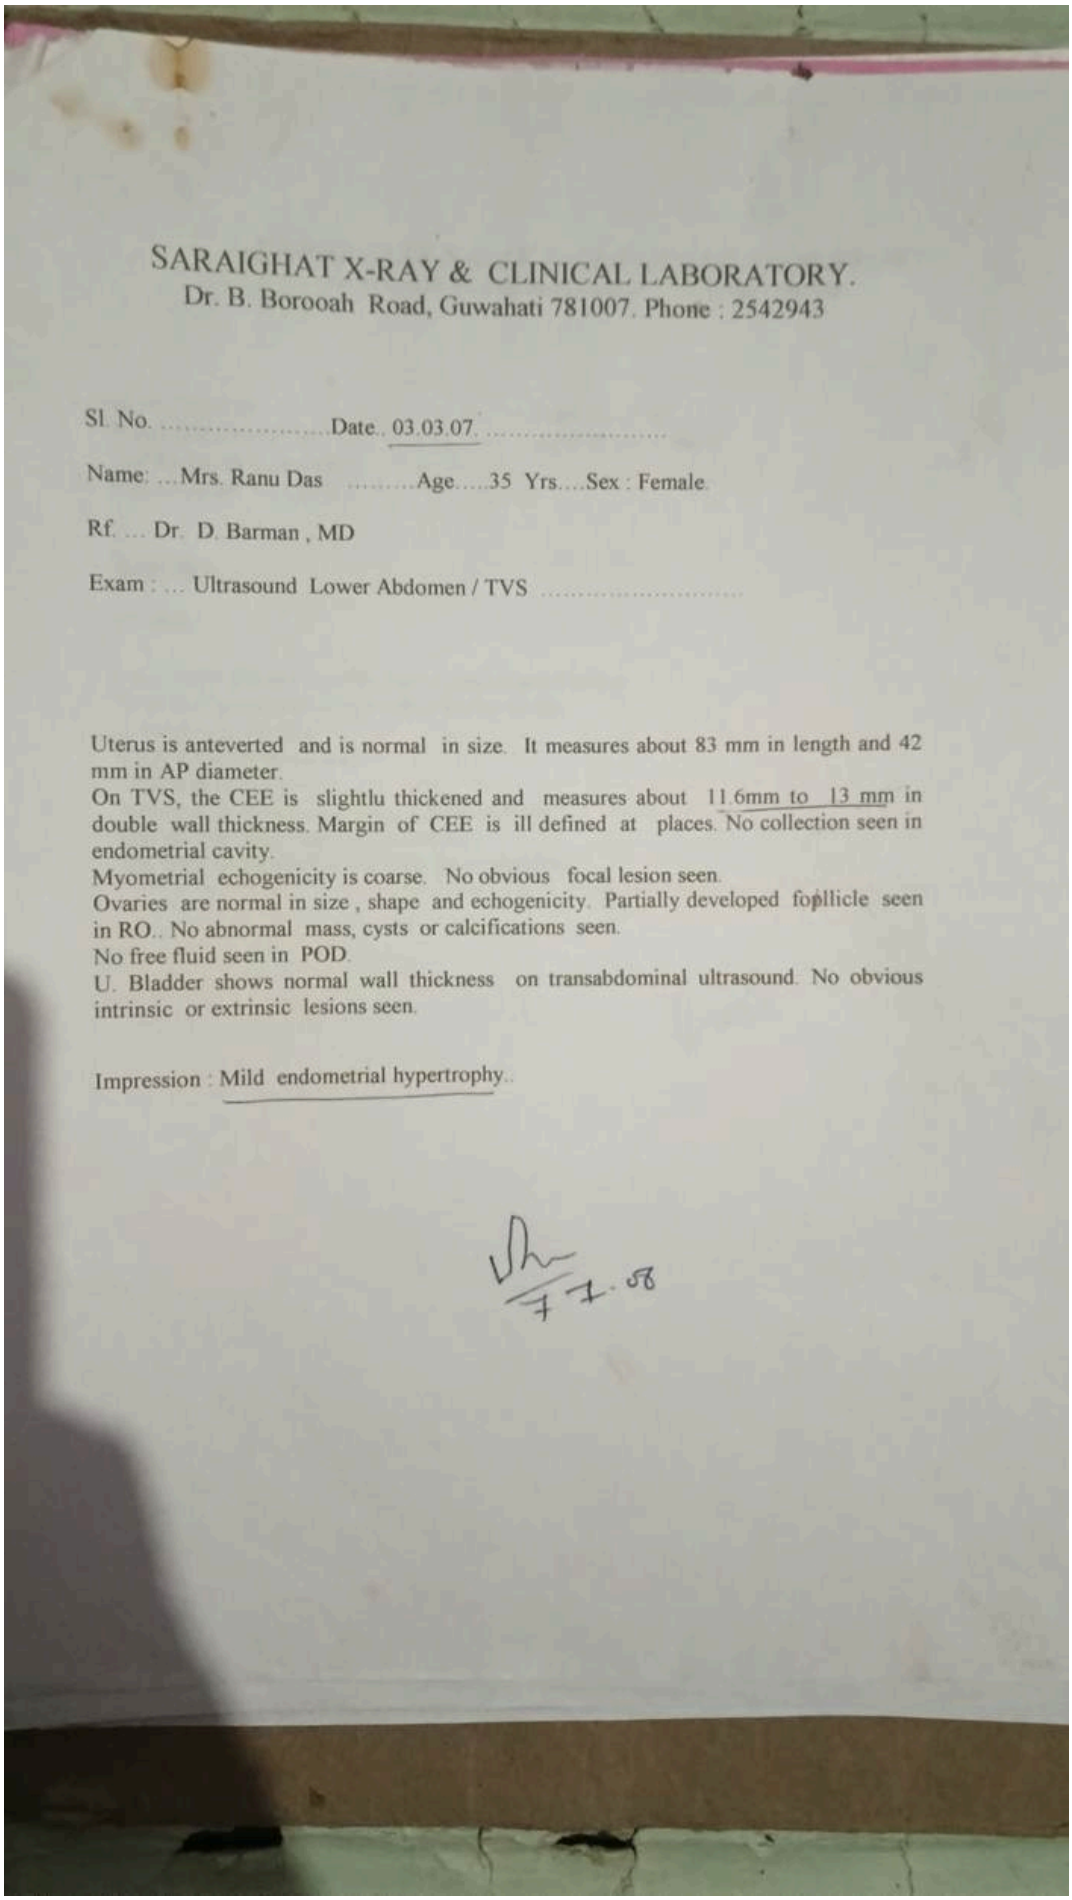

Saraighat X-Ray & Clinical Laboratory (Wellspring), Dr. B. Barooah Road, Guwahati-781007

Date 03.03.07 · Name: Mrs. Ranu Das · Age 35 Yrs · Sex: Female · Ref. Dr. D. Barman, MD · Exam: Ultrasound lower abdomen / TVS.

Uterus is anteverted and normal in size; measures about 83 mm in length and 42 mm in AP diameter. On TVS the CEE is slightly thickened and measures about 11.6 mm to 13 mm in double wall thickness. Margin of CEE is ill defined at places. No collection seen in endometrial cavity. Myometrial echogenicity is coarse; no obvious focal lesion. Ovaries are normal in size, shape and echogenicity; partially developed follicle seen in RO. No abnormal mass, cysts or calcifications. No free fluid seen in POD. U. bladder shows normal wall thickness; no obvious intrinsic or extrinsic lesions.

IMPRESSION: Mild endometrial hypertrophy. Signed 7.3.07 [?].

Exam : ... Ultrasound Lower Abdomen / TVS .....

Uterus is anteverted and is normal in size. It measures about 83 mm in length and 42 mm in AP diameter.
On TVS, the CEE is slightlu thickened and measures about 11.6mm to 13 mm in double wall thickness. Margin of CEE is ill defined at places. No collection seen in endometrial cavity.
Myometrial echogenicity is coarse. No obvious focal lesion seen.
Ovaries are normal in size , shape and echogenicity. Partially developed follicle seen in RO.. No abnormal mass, cysts or calcifications seen.
No free fluid seen in POD.
U. Bladder shows normal wall thickness on transabdominal ultrasound. No obvious intrinsic or extrinsic lesions seen.

Impression : Mild endometrial hypertrophy..

154. 03/07/2007 — Ultrasound whole abdomen

Saraighat X-Ray & Clinical Laboratory, Dr. B. Barooah Road, Guwahati-781007

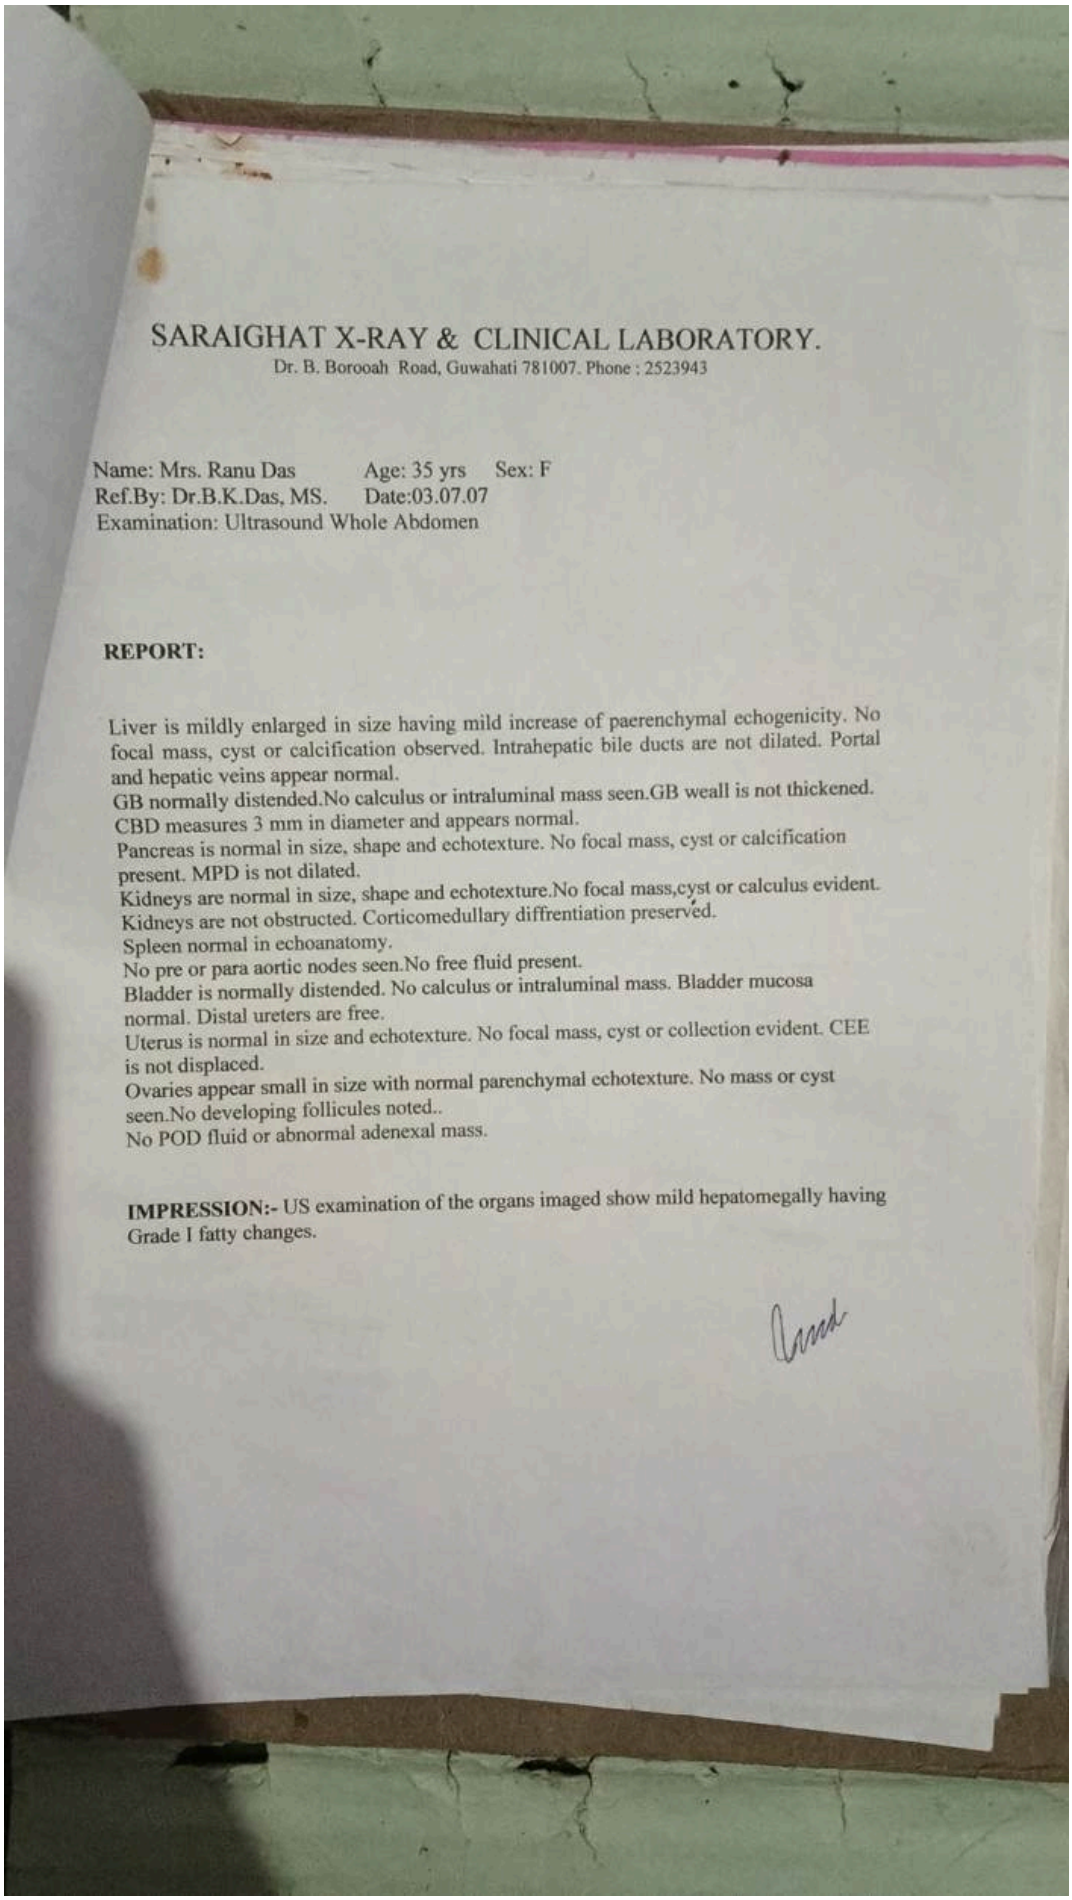

Name: Mrs. Ranu Das · Age 35 yrs · Sex F · Ref. By Dr. B.K. Das, MS · Date 03.07.07 · Examination: Ultrasound whole abdomen.

Liver is mildly enlarged, having mild increase of parenchymal echogenicity. No focal mass, cyst or calcification observed. Intrahepatic bile ducts are not dilated. Portal and hepatic veins appear normal. GB normally distended; no calculus or intraluminal mass; GB wall is not thickened. CBD measures 3 mm in diameter and appears normal. Pancreas is normal in size, shape and echotexture; no focal mass, cyst or calcification present; MPD is not dilated. Kidneys are normal in size, shape and echotexture; no focal mass, cyst or calculus evident; kidneys are not obstructed; corticomedullary differentiation preserved. Spleen normal in echoanatomy. No pre- or para-aortic nodes seen. No free fluid present. Bladder is normally distended; no calculus or intraluminal mass; bladder mucosa normal; distal ureters are free. Uterus is normal in size and echotexture; no focal mass, cyst or collection evident; CEE is not displaced. Ovaries appear small in size with normal parenchymal echotexture; no mass or cyst seen; no developing follicles noted. No POD fluid or abnormal adnexal mass.

IMPRESSION: US examination of the organs imaged shows mild hepatomegaly having Grade I fatty changes.

159. 14/11/2007 — Ultrasound whole abdomen with TVS

Saraighat X-Ray & Clinical Laboratory, Dr. B. Barooah Road, Guwahati-781007

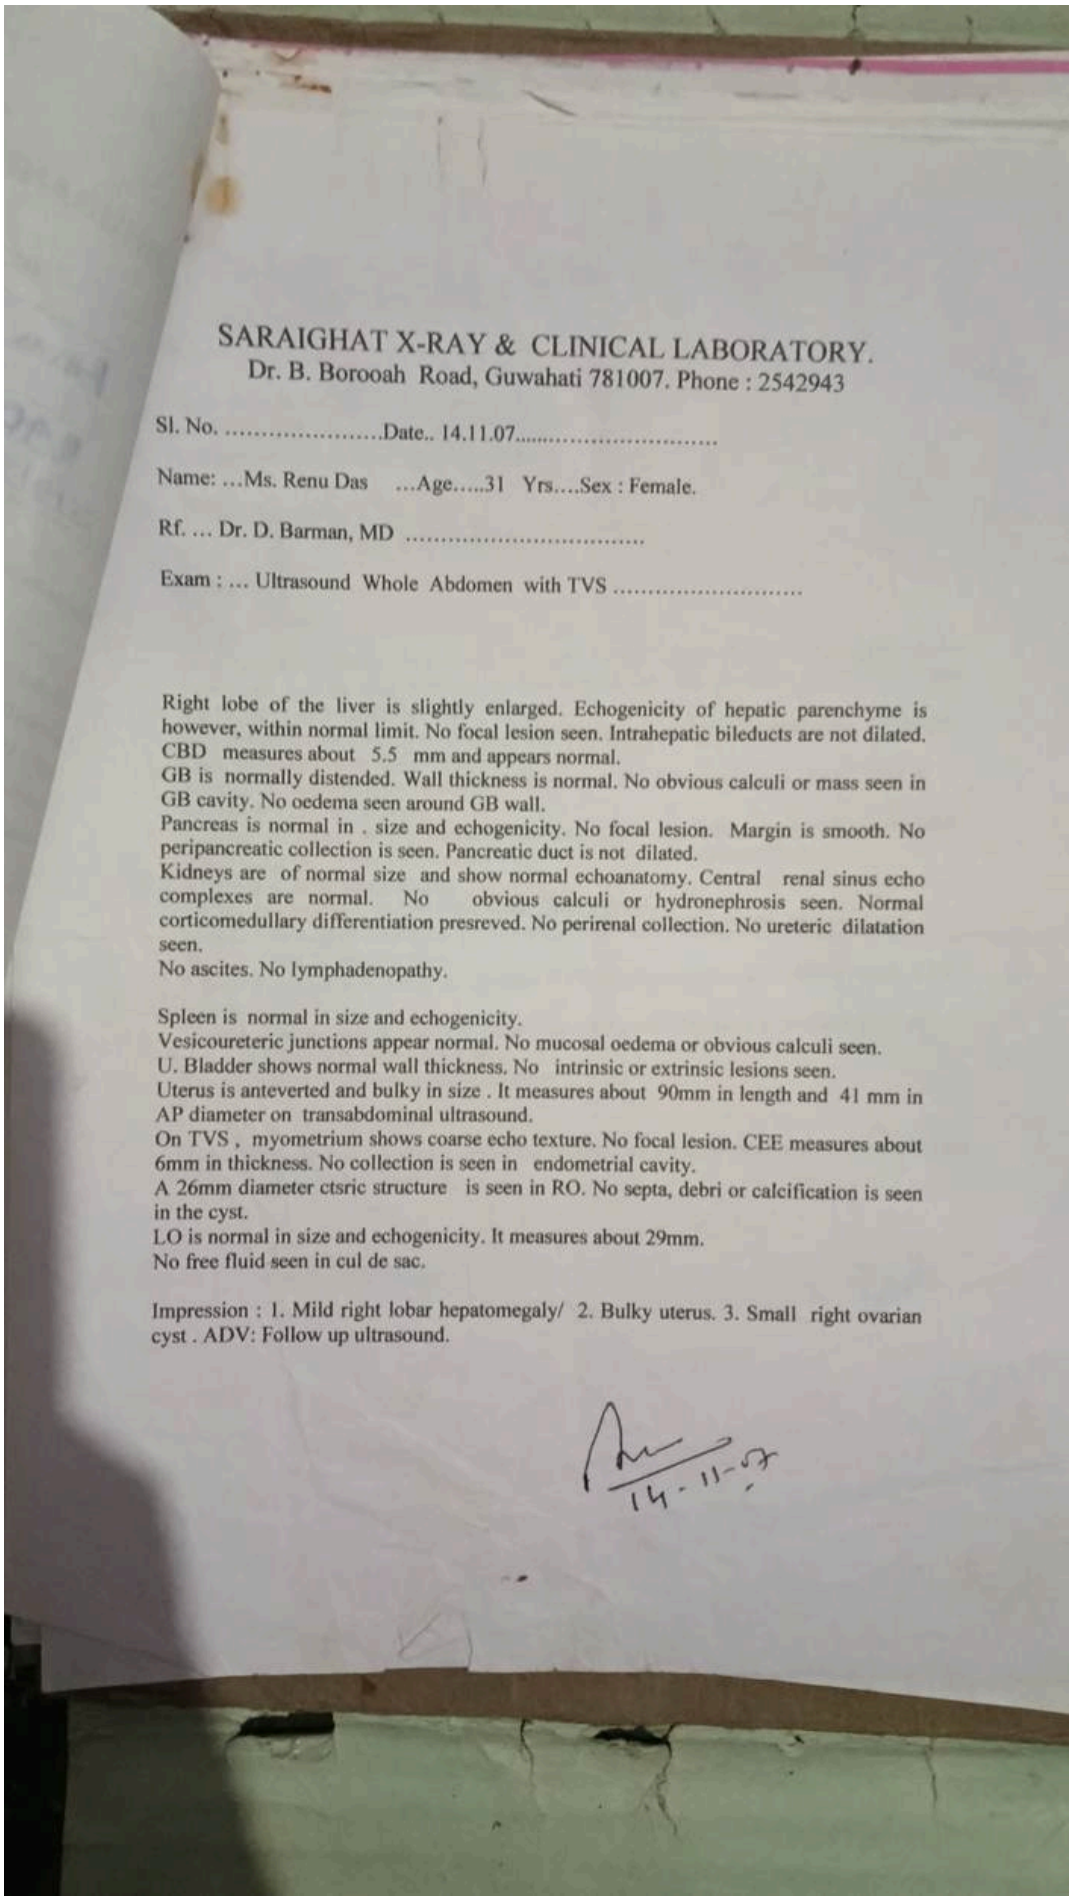

Date 14.11.07 · Name: Ms. Renu Das · Age 31 [as printed] Yrs · Sex: Female · Rf. Dr. D. Barman, MD · Exam: Ultrasound whole abdomen with TVS.

Right lobe of the liver is slightly enlarged; however, echogenicity of hepatic parenchyme is within normal limit. No focal lesion seen. Intrahepatic bile ducts are not dilated. CBD measures about 5.5 mm and appears normal. GB is normally distended; wall thickness is normal; no obvious calculi or mass seen in GB cavity; no oedema seen around GB wall. Pancreas is normal in size and echogenicity; no focal lesion; margin is smooth; no peripancreatic collection is seen; pancreatic duct is not dilated. Kidneys are of normal size and show normal echoanatomy; central renal sinus echo complexes are normal; no obvious calculi or hydronephrosis seen; normal corticomedullary differentiation preserved; no perirenal collection; no ureteric dilatation seen. No ascites; no lymphadenopathy. Spleen is normal in size and echogenicity. Vesicoureteric junctions appear normal; no mucosal oedema or obvious calculi seen. U. bladder shows normal wall thickness; no intrinsic or extrinsic lesions seen. Uterus is anteverted and bulky in size; measures about 90 mm in length and 41 mm in AP diameter on transabdominal ultrasound. On TVS, myometrium shows coarse echotexture; no focal lesion; CEE measures about 6 mm in thickness; no collection in endometrial cavity. A 26 mm diameter cystic structure is seen in RO; no septa, debris or calcification in the cyst. LO is normal in size and echogenicity; it measures about 29 mm. No free fluid seen in cul de sac.

IMPRESSION: 1. Mild right lobar hepatomegaly. 2. Bulky uterus. 3. Small right ovarian cyst. ADV: Follow-up ultrasound. Signed 14-11-07.

All investigations have their limitation which are imposed by the limits of sensitivity and specificity of individual assay procedures as well as the specimen received by the laboratory investigations never confirm the final diagnosis of the disease. They only help in arriving at a diagnosis in conjunction with clinical presentation and other related investigations.

184. 30/11/2014 — USG of whole abdomen

Primus Imaging Pvt. Ltd., G.S. Road, Bhangagarh, Guwahati-781005 — Dr. A.K. Bhuyan, MD, Consultant Radiologist

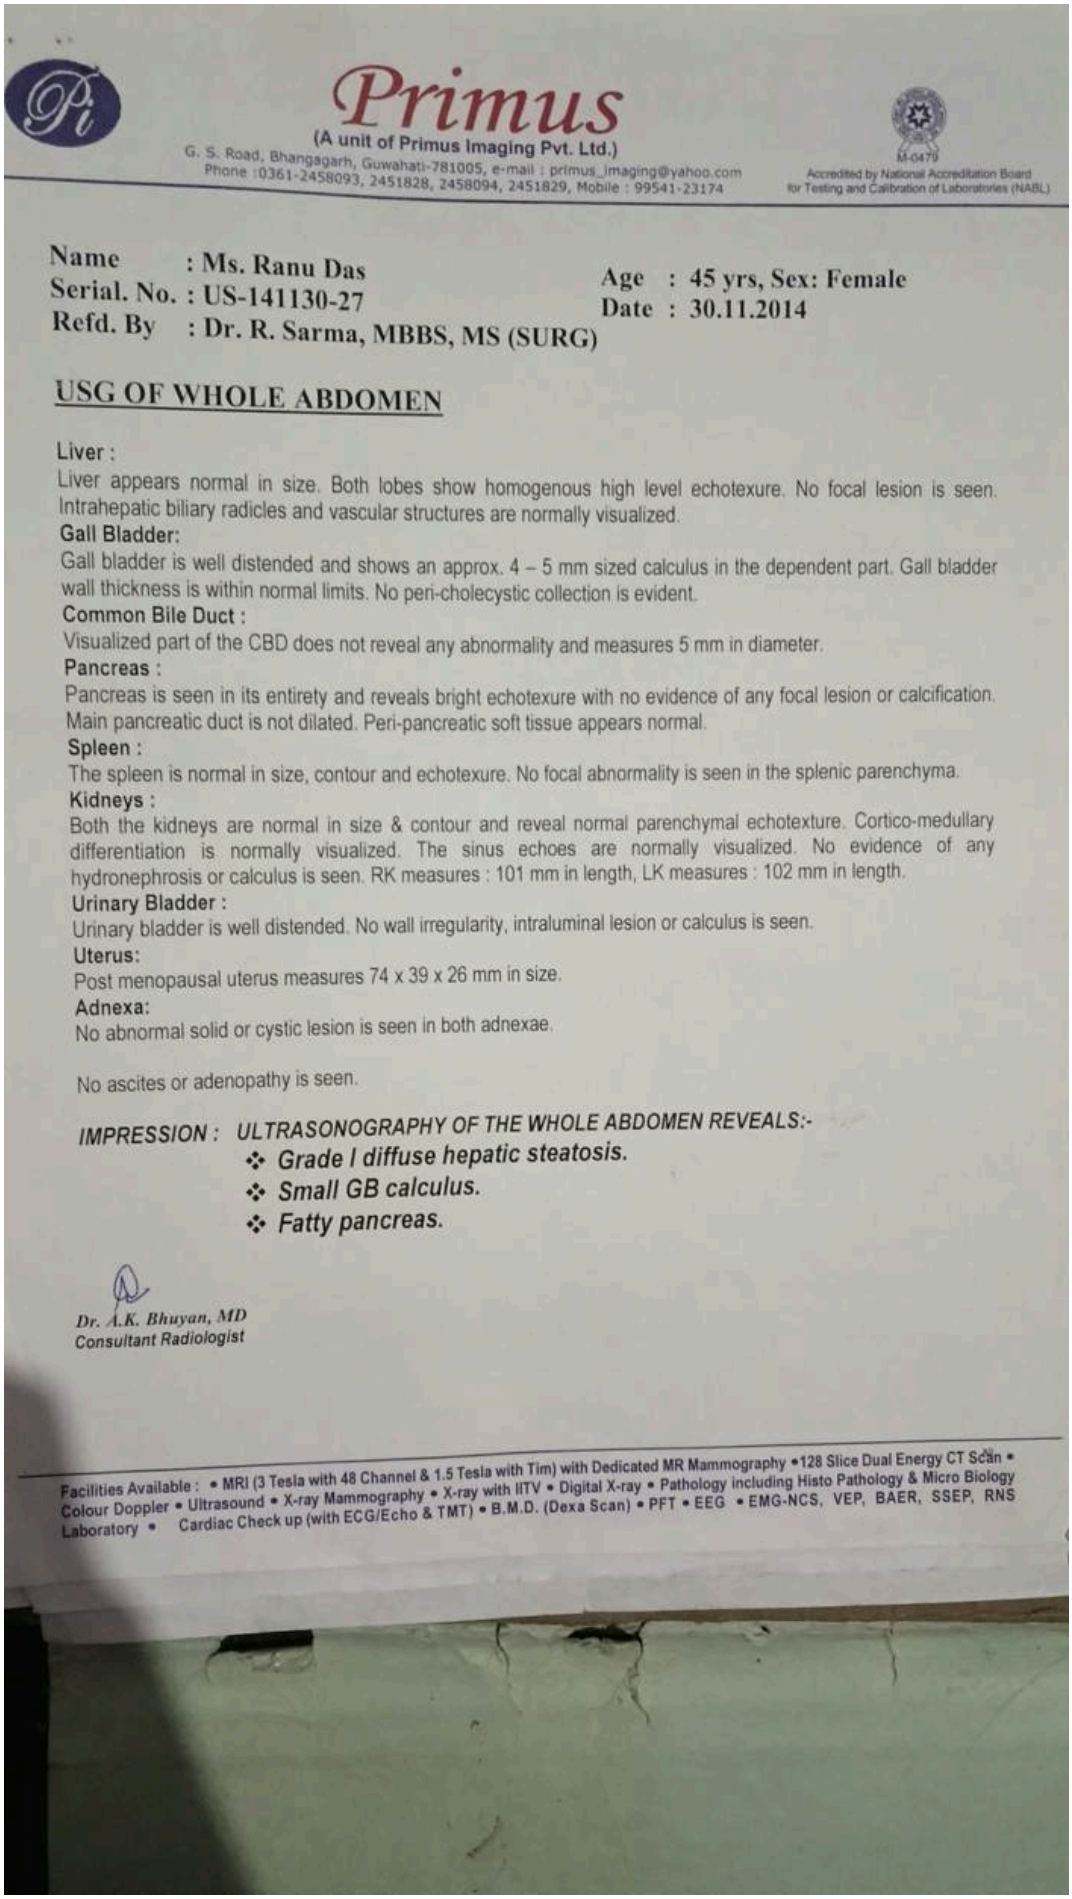

Name: Ms. Ranu Das · Age 45 yrs · Sex Female · Serial No. US-141130-27 · Date 30.11.2014 · Referred by Dr. R. Sarma, MBBS, MS (Surg).

LIVER: appears normal in size; both lobes show homogenous high-level echotexture; no focal lesion is seen; intrahepatic biliary radicles and vascular structures are normally visualized. GALL BLADDER: well distended and shows an approx. 4–5 mm sized calculus in the dependent part; wall thickness within normal limits; no peri-cholecystic collection. COMMON BILE DUCT: visualized part does not reveal any abnormality; measures 5 mm in diameter. PANCREAS: seen in its entirety and reveals bright echotexture with no evidence of any focal lesion or calcification; main pancreatic duct not dilated; peri-pancreatic soft tissue appears normal.

SPLEEN: normal in size, contour and echotexture; no focal abnormality. KIDNEYS: both normal in size & contour and reveal normal parenchymal echotexture; cortico-medullary differentiation normally visualized; sinus echoes normal; no hydronephrosis or calculus; RK 101 mm, LK 102 mm in length. URINARY BLADDER: well distended; no wall irregularity, intraluminal lesion or calculus. UTERUS: post-menopausal uterus measures 74 × 39 × 26 mm. ADNEXA: no abnormal solid or cystic lesion in both adnexae. No ascites or adenopathy.

IMPRESSION — ULTRASONOGRAPHY OF THE WHOLE ABDOMEN REVEALS: Grade I diffuse hepatic steatosis; small GB calculus; fatty pancreas.
